SOURCE Monitored Broadcast (Khabarovsk, Russian)

Many fishing enterprises and fishing kolkhozes of the Khabarovsk Krai are successfully coping with the obligations confronting them: 18 combines and fishing plants, and 54 fishing kolkhozes of the krai have already fulfilled the 1954 plans and have given the State 600,000 poods of fish over the requirement.

The collective of Khairuzovo Fish combine fulfilled the annual plan by 136 percent and gave the State an additional 20,000 poods of fish. The collective of the Avachinsky Fish combine gave the State 140,000 poods of fish over the plan.

The workers of Ayan and Chumikan fish combines also overfulfilled the annual plan. All the fishing kolkhozes of the Yelizovo Rayon of Kamchatka Oblast fulfilled the annual plans ahead of schedule and gave the State an additional 100,000 poods of fish.

The crew of the fishing boat Moryak overfulfilled the annual plan by two times and gave the State 17,000 poods of fish over the plan. The crew of fishing boat Mochnyy fulfilled the annual plan by 220 percent.

All this proves that the fishing industry can not only fulfill but also overfulfill the plan. Therefore there should not be any shortcomings regardless of storms and lack of fish. The fishing industry of the Khabarovsk Krai has given to the State 130,000 centners of fish more during the 11 months of 1954 than during the whole of 1953.

However there are some shortcomings, the enterprises of the Main Administration of Kamchatka Fishing Industry and many of the artels of the fishing kolkhozes of the peninsula are not coping with their obligations. Kamchatka has been provided with all the necessities in effort to make the plan successful, and with appearance of a large variety of fish along the Kamchatka Coast good results should have been achieved.

In connection with this the bureau of the krai Party committee has instructed the Party organizations of the fishing enterprises to expand Socialist competition and to disseminate more readily the useful information acquired by the fishing enterprises through experience. Already many of the fishing kolkhozes have assumed new and higher obligations, and are successfully coping with them. As an example the crew of the trawler Polyarnik fulfilled the November plan by 150 percent. The crew of the trawlers Chaika, Tikhookeanskaya Zvezda, and others have overfulfilled the November plan by 1.5 times. The fishing kolkhozes of Nizhne-Amur have successfully started the under-ice fishing.

The fishing artel Krasnyy Pogranishnik has fulfilled the annual plan by 120 percent. The fishermen of the Kolkhoz Zelenaya Roshch delivered the first 200 poods of fish

caught under ice. The fishermen of Okhotsk Rayon delivered their first 1,000 poods of fish caught under ice.

The fishermen of the Kolkhoz Imeni Kirova of Nizhne-Amur overfulfilled the annual plan by 90 percent. The fishermen of the Kolkhoz Imeni Stalina of the same rayon have fulfilled two annual plans recently. The fishermen of the kolkhozes of Central Amur were commended several times during 1954 for their outstanding work during the year.
